Q31 - We invite you to give constructive feedback, positive or negative. Our TAs want to provide the best learning conditions possible.

We invite you to give constructive feedback, positive or negative. Our TAs...

Noah was a great TA, was easy to reach out to and was very understanding. His feedback on assignments was always helpful.

Noah was an amazing TA, he was a great conversation facilitator and he always managed to expand on students ideas on the material.

Awesome guy, super chill and helpful. No complaints.

Noah was a really good TA. I felt comfortable attending his classes as he was aware that some students were not comfortable speaking out. He would frame the class in ways that were comfortable for every student which made going to class more enjoyable. He was also very organized and always answered emails right away. In addition he gave good feedback on all the assignments which is beneficial to our final paper.

We invite you to give constructive feedback, positive or negative. Our TAs...

The way Noah handles tutorials is much different than how, in my experience, other TAs handle tutorials. Whereas other TAs have a mix between lecture and discussion style tutorials, Noah is purely a discussion-based tutorial. I feel as I get enough from the lecture itself where it is nice to have a discussion forum to talk about contemporary issues. I actually look forward to this tutorial very much because it genuinely allows me to think about issues and discuss them. Equally important in politics classes is that Noah is not politically biased. Whereas in my experience, other TAs will enact some sort of censorship or skew towards one side of the political spectrum, Noah is very respecting of conservatives and facilitates meaning discussion by bringing to light dissenting views.

Struggled to encourage student participation at times. Also came across as very biased towards a Leftist point of view. This isn't necessarily a problem in all courses, but for a course on Canadian Politics it's valuable and important to be able to understand and present an unbiased perspective on the material at hand.
